Possible use of Soil Vapor Extraction as an Expedited Action for Operable Unit 1 IHSS 119 1

Sue Stiger Associate General Manager
Environmental Restoration Management
EG&G Rocky Flats Inc

It is our current understanding that EG&G is reviewing possibilities for expedited actions specifically to remove the soil Hot Spots at the Operable Unit (OU) 1 881 Hillside. The purpose of this letter is to request EG&G to also evaluate the possibility of using Soil Vapor Extraction (SVE) at IHSS 119 1 as an additional action to remove volatile organic compounds (VOCs).

We are requesting that EG&G prepare a proposal which outlines the scope and estimated costs for these expedited actions. The SVE evaluation should focus on either renting or buying a soil vapor extraction unit. This should be cheaper and faster than building an SVE as was done for OU2. This action could also focus on utilizing the existing collection well at 119 1. We believe this could be done administratively by modifying the existing Interim Measure/Interim Remedial Action (IM/IRA) however this needs to be fully evaluated and the procedures outlined.

We will contact the OU 1 project manager to schedule a preliminary meeting to discuss a schedule and scope for the proposal and for these expedited actions. Our desired target date for the schedule is May 16 1994.

Please contact Scott Grace at 966 7199 or Tim Reeves at 966 7530 if you have any questions.
